

PATRICK W. MOORE

Lead Software/DevOps Engineer

Phone: 832.803.8050

Email: Patrickwmoore88@gmail.com

PROFESSIONAL SUMMARY

Results-driven Lead Software/DevOps Engineer with over 10 years of comprehensive IT experience, including 4.5+ years specializing in cloud infrastructure and automation. Expert in AWS/Azure cloud services, CI/CD implementation, and infrastructure as code. Proven track record of delivering scalable deployment solutions and managing complex multi-OS environments. Strong foundation in networking concepts, security implementation, and system architecture.

CORE COMPETENCIES

- Cloud Infrastructure (AWS EC2, S3, IAM, Azure)
- DevOps Practices & CI/CD Implementation
- Infrastructure as Code & Automation
- Multi-OS Environment Management (Windows/Linux)
- Large-Scale Data Management (100+ TB)
- Technical Team Leadership
- Deployment Automation

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, IAM, GovCloud), Azure (App Services, DevOps, Monitor)

Operating Systems: Windows Server, Linux (Debian-based), macOS

Infrastructure as Code: ARM Templates, AWS CLI

Programming Languages: Python, Node.js, PowerShell, Bash, C#

Version Control: Git, branching strategies, repository management

Containerization: Docker

Databases: PostgreSQL, MongoDB, SQL Server, Neo4j

Web Technologies: ASP.NET Core, JavaScript, HTML, CSS

Networking: TCP/IP, VLANs, load balancing, routing protocols

EDUCATION

Certification: Software Engineer

School: Digital Crafts | Houston, TX

End Date: 2020

Program: Intensive 16-week Software Engineering Boot Camp covering full-stack development technologies including JavaScript, Python, React, Node.js, and database systems

PROFESSIONAL EXPERIENCE

Owner Operator

Conversion Web Design | 2024 - Current

- Design affordable websites tailored to specific business goals and target audience
- Build comprehensive search engine optimization (SEO) services to help business increase their online visibility and drive qualified traffic to their site
- Offer quarterly analytical report to show customers traffic progression and develop new approaches for further growth
- Designed branding for businesses to further establish and maintain a cohesive brand identity
- Acquiring new clients by building out and present demo hero pages for customer consideration
- Design and develop a home-grown customer relationship management (CRM) tool for in-house use

Lead Software/DevOps Engineer

Universities Space Research Association (USRA) | 2021 - 2025

- Architected and managed comprehensive AWS infrastructure across 30+ servers in six environments spanning GovCloud and Commercial sectors
- Engineered secure CI/CD pipelines decreasing deployment time by 65% while ensuring 99.9% deployment reliability
- Designed and developed multiple software components using Node.js, Bash, and Python to automate infrastructure management
- Established robust Identity and Access Management (IAM) solutions enhancing system security through role-based access controls

- Created automation scripts for data verification, backup, recovery, and configuration management, minimizing manual intervention by 75%
- Sustained critical systems with 99.95% uptime through proactive monitoring and optimization
- Spearheaded technical teams through infrastructure migrations and upgrades while preserving system availability
- Orchestrated and analyzed 100+ TB datasets for accurate decision-making and reporting
- Leveraged AWS CLI to develop custom automation tools lowering administrative overhead by 40%
- Implemented comprehensive security measures including multi-factor authentication and role-based access control (RBAC)

Web Developer

Radix Data | 2020 - 2021

- Developed comprehensive PowerShell automation scripts integrated with ARM templates for end-to-end environment deployment
- Automation of client environment provisioning trimming setup time from days to hours
- Formulated reproducible deployment processes for full-stack implementation from infrastructure to application layer
- Administered Azure subscriptions and resources, balancing cost while preserving performance across multiple environments
- Decreased application deployment errors by 50% through improved CI/CD processes
- Minimized system downtime by 35% through implementation of automated monitoring and alert systems

Developer in Residence

Digital Crafts | 2019 - 2020

- Assisted teaching staff and tutored students in full-stack development technologies and best practices

- Conducted algorithm presentations and provided critical thinking exercises for software development concepts
- Guided students through troubleshooting and bug-fixing processes, improving their problem-solving skills
- Curated educational codebase repositories and documentation for student reference
- Mentored junior developers in modern development practices and coding standards

Systems Administrator

Transcore | 2016 - 2019

- Administered diverse infrastructure including Windows and Linux servers for mission-critical systems
- Deployed and configured VLAN configurations and network routing protocols boosting network security and performance
- Delivered expert-level troubleshooting across multiple operating systems and network infrastructures
- Trained technical staff in system operations and troubleshooting procedures
- Accelerated system recovery time by 70% through implementation of advanced backup solutions
- Collaborated with network teams on infrastructure planning and implementation projects
- Enforced security compliance across all systems through regular audits and updates
